

DANA SWOPE

13 years of service

Vice president construction

- Project management • Vertical construction
- Architectural engineering

Dana Swope joined Woodbine in 1996 and serves as project manager on vertical projects. She has been responsible for the project management of multiple corporate headquarters facilities, hotel and hospitality venues, and historic preservation assignments.

Ms. Swope's responsibilities include pre-development; pre-construction; developing and analyzing of Requests for Proposals from consultants, contractors and suppliers; project schedule development; interface with owners, operators, consultants, contractors, suppliers, and governmental agencies and departments; design and construction cost control and scheduling from project start to finish; as well as furniture, fixture and equipment design, purchasing and installation processes.

Before joining Woodbine, she spent six years in preconstruction services, cost estimating and project administration for Austin Commercial, Inc., in Dallas, Texas, with construction structural responsibilities for major manufacturing facilities for Texas Instruments, Twinstar Semiconductor, Inc., and Advanced Micro Devices.
